# Forsys' Cloud-Ready Data Converter & Reconciler Solution

Forsys has developed an accelerator named **Cloud-Ready Data Converter & Reconciler Solution** that eases the entire process of Data Conversion and Migration. Our accelerator provides a framework that delivers a streamlined and cohesive methodology for data migration from source systems to the Oracle Cloud.

It facilitates the integration with Oracle Cloud modules, encompassing Cloud Financials and SCM Cloud, for both master and transactional data.

**Cloud-Ready Data Converter & Reconciler Solution** offers a robust and all-encompassing approach for data transitioning from both Oracle and non-Oracle legacy systems to contemporary SaaS applications within the Oracle Cloud infrastructure.

## Cloud-Ready Data Converter & Reconciler Solution Features

→ Data Mapping up to 90%

→ Robust Error Handling and Logging

→ Scheduling and Monitoring

→ Bulk Data Transfer

→ Data Validation and Checks

→ Reusability and Scalability

→ Ready to Build in

→ Migrating Data from any Source whether EBS, SAP, BPICS, & other Applications

→ Ready-to-Use Templates

## Cloud-Ready Data Converter & Reconciler Solution Benefits

→ 100% Data Accuracy & Reconciliation

→ 100% User-friendly Schedule

→ 90 % Reduction in Manual Effort

→ 5x Reduction in Overall Cycle Time

→ Reduced Project Timelines and Costs

→ Faster Data Migration

→ Increase in Customer Satisfaction

## Cloud-Ready Data Converter & Reconciler Solution Differentiators

**Pre-Built Integration Framework** - Supports data conversion of Master and Transactional data which can cater to client requirements.

**Expertise in Oracle ERP Systems** - A global team of Oracle Cloud certified Solution architects, developers, integration, and administrators experienced in building, testing, and executing Cloud-Ready Data Converter & Reconciler Solution integrations for Data conversions.

**Reusable & Scalable** - Quick deployment using existing reusable and scalable templates along with essential flows for common use cases across industries. We also build templates from scratch for the most complex use cases.

**Support for Multiple Source Systems** - Support different Source systems to convert the Data into the Oracle cloud to ensure integrations remain operational indefinitely.

## Success Story →

A manufacturing company in Texas faced challenges due to insufficient visibility into its planned orders and constrained storage space. Forsys employed its proprietary **Cloud-Ready Data Converter & Reconciler Solution**, an accelerator, enabling the manufacturer to upload and reconcile precise data. This allowed for accurate order planning without any waste.

## About Forsys

Forsys is an Oracle Gold certified Cloud Excellence Implementation Partner, specializing in ERP Fusion Cloud Financials and Fusion Cloud SCM operations. Forsys has a team of 100+ certified resources and has seamlessly executed 35+ projects using standardized frameworks, industry templates, innovative solutions, and in-house accelerators to expedite data conversion, migration, and integration.
